INDICATIONS POINT TO A NEW FIF-TY MILLION ISSUE

President Cleveland Anxions to Provide in Time for What He Thinks Thinks the Emergency Less Urgent-Belief in Early Issue Current

WASHINGTON, Nov. 10 .- There are strong

indications that another issue of bonds will be made during the coming week. For some time post the conviction has been growing upon the president that an issue of another \$50 000,000 would be necessary and upon his return from Buzzards bay he expressed to the members of his cabinet his belief that the issue could not be long delayed and that the sooner it was made the better. He saw the treasury receipts constantly growing less, with no immedi are prospects of any favorable change. Already the gold reserve has reached a of \$4,000,000 below the lowes point touched previously to the last is us with the probabilities strongly in tovor of sill further and large with crawals for export as soon as the usual spring outflow sets in. For the last several years, the spring withdrawals for extent samed in amount from \$20,000,000 to \$50,000,000 and even more, and it was not good business judgment, in the opinion of good dustaines largement to the opinion of the president, to wait notif the gold re-serve was in fact w p-d out before meas-ures should be taken to replenish it. Sec-retary Cartisis, it is understood, took a more cop-ful view of the situation. He argued that the receipts from internal revenue and customs must of necessity soon snow a marked increase. The supply of whisky which was withdrawn from bond jos previous to the passage of the new tariff act, to avoid the payment of the additional 20 cents per gallon, would very soon be exhausted and that the demands of the trade would result in largely in-cluded the control of the control of the control of the center of the control what was true of the internal revenue was equality true of the customs. Just before the tariff act went into operation the withdrawal from bond of goods of every character. This supply had now been exhausted, or nearly so, and it was ponent two years ago,
Air. Simons, the representative-elect, has made the most able figut of any man in the state of knosas, when you consider remove any necessity for another issue of what he had to contend against. He was challer and by the contend against. He was challer and by the contend against. If was considered by the contend against. If was contended by the contend against the contended by the contende signs of any important withdrawais of gold for export and it was his opinion that the emergency might be pas-fully without increasing the ; ing the last issue taught him that the issue of snother \$50,000,000 might fall short of recouping the gold reserve by that amount. It was an easy matter to deposit ing it enders at the sub-treasuries and de-mand gold with which to pay for the bonds. This evision of the spirit of the law au horizing the is-ue of the boars was s veral times detected during the set lements for the lest issue and he feared. it might be practiced again. The presi-dent, however, thought that all things considered, he preferred not to wait until congress reasembled in December, when measures might be taken to obstruct the issue. In his opinion the situation demanded the issue, and there should be no unnecessary delay in the master.

At the request of the president, Secretary Carlisis joined him at Woodley this afternoon, and at a late nour had not returned to the city. Persons in a position to know, believe that the issue will be efficially announced before the close of congress reassembled in December, when

The performance will not only be a scientific one, but amusement will be interspersed thrombout that will be heartly enjoyed by all. The subjects will all be selected from the audience at the time, and experiments given that will be the winder of busiciass and students. One wender of physicians and students. One of his best tests is the transmission of thought by mental telegraphy. A com-mittee will be selected from the audience who will accompany one of the subjects to some portion of the city, selected by the ommittee, and they will hold a converse tion with the subject taken, while a per on under the influence of hypnotise inform the audience of the communication given by the committee. Mr. Jones is auxious that his exhibition be thoroughly tested before he leaves the city, as he expects to start upon his tour with the in-dorsement of the citizens of Wicalta. He will expess many false theories as to the science of hypootism, and expects to be able to prove to all that it is impossible for a hypotist to cause a subject to com-mit a crime. All ministers of the gospul are cordially invited to attend, and they will be admitted free of charge the first
